Hilbert Spaces Notation 1.1. Throughout, F will denote either the real line \mathbb{R} or the complex plane \mathbb{C} . All vector spaces are assumed to be over the field F . Definition 1.2 (Semi-Inner Product, Inner Product). If X is a vector space over the field F , April 1st, 2024 Spectral Theory in Hilbert Spaces (ETH Zurich H, FS 09) This script follows up on a standard course in functional analysis and builds on the principles of functional analysis to discuss one of the most useful and widespread among its applications, the analysis, through spectral theory, of linear operators $T : H_1 \rightarrow H_2$ between Hilbert spaces. April 2nd, 2024 NUMBERS AND FUNCTIONS IN HILBERT'S FINITISM As Poincaré and such intuitionists as Brouwer and the later Weyl, Hilbert formulated a new program for the grounding of arithmetic. The two basic tenets of the program were finitism and an instrumentalist formalism. Finitism proceeds from the conviction that certain basic statements of the mathematics of natural numbers, i.e., the March 11th, 2024. Hilbert's overall view of mathematics Epistemic elements like intuition in mathematics. Infinite sets were beyond the far reaches of mathematical intuition for them. Also, logic was too barren a field for exploring anything properly mathematical. Hilbert's axiomatic approach was an optimistic take over on the side of the logical foundations. For Each Choice Of Seminorms On A And On B We Define The Projective And Injective Seminorms On The Algebraic Tensor Product $A \otimes B$. These Families Of Norms Define The Projective And Injective Topologies. (Apr 10th, 2024).
